Lift tables and lifting platforms

ATLAS LIFT

Lifting solutions

F2X/F3X/SL2 multi-scissor series

Lifting capacity up to 5,000 daN

Industries

- Aerospace
- Construction/Logistics
- Food/Pharmaceutical
- Automotive
- Stage equipment
- Maritime
- Railway

Functions

- Ergonomics
- Handling
- Process

Designed and manufactured in France

Applications

- Operator height positioning
- Load height positioning
- Load transfer
- Machine loading and unloading
- Palletising
- Order picking
- Packaging
- Workstation layout
- Your own application...

Design

- Smooth or chequer-plate platform

- Joints, bearings and rollers fitted with maintenance-free self-lubricating bushes, designed as standard for 20 cycles per hour, 8 hours a day, 5 days a week

- Electro-hydraulic power unit with IP54 motor

- External electrical cabinet for 400 V three-phase 50 Hz supply

Standard version specifications

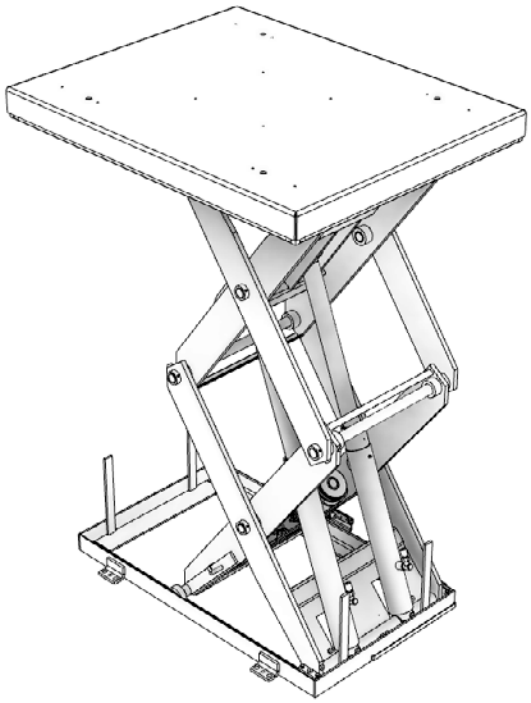

Range	Model	Lifting capacity (daN)	Length range (mm)	Width range (mm)	Closed height (mm)	Standard max. travel (mm)
SL2	Fixed double scissor lift table, "light series, 2 scissors"	up to 2,000	800 to 2,000	600 to 1,200	200 to 400	2,500
F2X	Fixed double scissor lift table	up to 5,000	1,600 to 4,500	1,200 to 2,400	500 to 900	6,300
F3X	Fixed triple scissor lift table	up to 6,000	600 to 4,000	400 to 2,400	300 to 1,500	8,200

Main standard options

- Up/down foot pedal control
- Side protection with weighted covers or bellows
- Manual or motorised swivel platform
- Tilting platform
- Safety guardrails
- Roller conveyors
- Joints for continuous operation at high cycle rates
- Mobile version
- Treatment for aggressive environments (sandblasting, PU paint, epoxy paint, metallisation, hot-dip galvanising)
- Designed and built for installation in ATEX zones
- RAL paint colour to customer requirements

Bespoke version

In addition to its Design Office, ATLAS LIFT has a Pre-Project Department for all your specific requirements: dimensions, capacities, speed, cycle rate, position...

ATLAS LIFT benefits

- **Made in France**
- **Premium product**
- **3-year warranty**
- **On-site commissioning**
- **After-sales service & maintenance**
- **Nationwide coverage in France through a network of area managers and integration partners**
- **Export department**

Maximum safety

The design and construction of these standard lift tables comply with French regulations transposing the European Machinery Directive 2006/42/EC. European lift table standards EN 1570-1 and EN 1570-2. All models are supplied with CE marking.
